Lack: falta
Labelled: etiquetadas
Logical: lógico/a
Removed: eliminados
School groups: grupos escolares
Scattered: dispersos/as
Tidy: ordenado/a
Unnecessary: innecesario/a
Wait: esperar

Nivel B1:

Authors: autores
Classics: clásicos
Collection: colección
Desk: mostrador
Ensure: asegurar
Go wrong: fallar
Label: etiqueta
Organised: organizada
Put back: volver a colocar
Space: espacio
Supposed: supuestamente
Update: actualizar

Nivel B2:

Adequate: adecuado/a
Aquatic life: vida acuática
Authorities: autoridades
Contaminated: contaminado/a
Designate: designar
Discolored: descolorido/a
Emit: emitir
Ecosystem: ecosistema
Foul odor: olor desagradable
Infrastructure: infraestructura
Promote: promover
Regulations: regulaciones
Treat: tratar
Waste bins: contenedores de basura

Nivel C1:

Labelled: etiquetadas
Logical: lógico/a
Organised: organizada
Regulations: regulaciones
Scattered: dispersos/as
Tidy: ordenado/a

Nivel C2:

None in the given text.

Reading Part

03

Four people were interviewed by a local newspaper about their experiences and concerns regarding the pollution issues in a city park.

Read the texts and answer Questions 16 – 22 on the next page.

A City Park

Person A

'The issue with the city park is the pollution. The air is often filled with smog and the smell of exhaust fumes from the nearby road. It's difficult to breathe and enjoy the fresh air. The park should have more trees and plants to help purify the air and create a healthier environment. Additionally, the littering problem is out of control, with trash scattered all around. More waste bins should be placed throughout the park and regular cleaning should be implemented.'

Person B

'The water in the park's pond is heavily contaminated. It's discolored and emits a foul odor. This poses a risk to the aquatic life and the overall ecosystem. The authorities should take measures to treat the water and ensure its cleanliness. It would also be beneficial to educate visitors about the importance of not throwing waste into the pond.'

Person C

'The park lacks proper recycling facilities. There are only a few recycling bins, and they are often overflowing with mixed trash. It's essential to promote recycling and provide adequate bins for different types of recyclable materials. The lack of awareness and infrastructure for recycling is contributing to the pollution problem.'

Person D

'The noise pollution in the park is unbearable at times. There are constant honking sounds from the nearby traffic, loud music playing from portable speakers, and even construction noises. It's challenging to find a peaceful spot to relax and enjoy nature. Implementing stricter regulations regarding noise levels and designating quiet zones within the park would greatly improve the experience.'

03

Four people were interviewed by a local newspaper about their experiences and concerns regarding the pollution issues in a city park.
Read the texts and answer Questions 16 – 22 on the next page.

16. Who believes the park needs more efforts to reduce pollution?

- A. Person A B. Person B C. Person C D. Person D

17. Who wants the water in the park's pond to be clean?

- A. Person A B. Person B C. Person C D. Person D

18. Who thinks the park should have better recycling facilities?

- A. Person A B. Person B C. Person C D. Person D

19. Who is concerned about the noise pollution in the park?

- A. Person A B. Person B C. Person C D. Person D

20. Who thinks the park needs more trees and plants for a healthier environment?

- A. Person A B. Person B C. Person C D. Person D

21. Who is bothered by the air pollution in the park?

- A. Person A B. Person B C. Person C D. Person D

22. Who believes the park suffers from excessive littering?

- A. Person A B. Person B C. Person C D. Person D
